

Measuring Guide

This document is to help instruct you on how to take accurate measurements for your radiation protection garment.

What do you need?

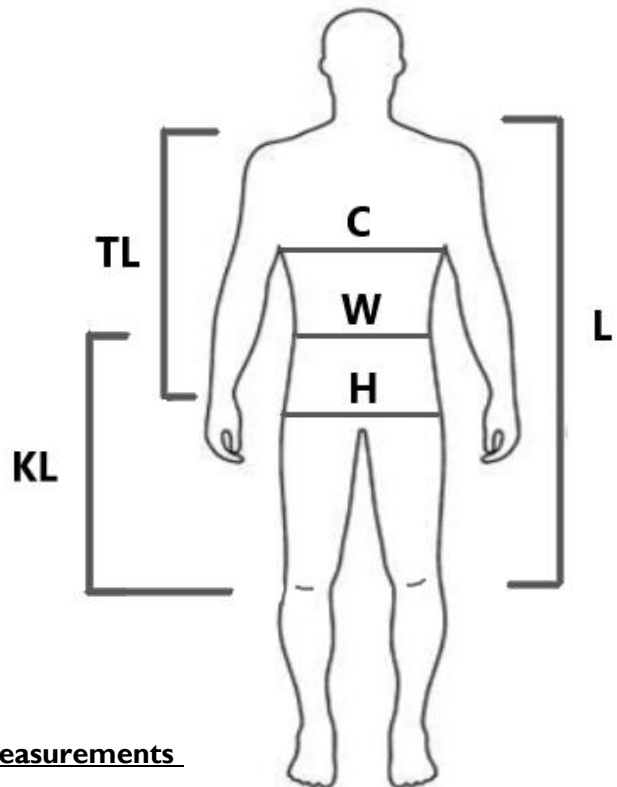

- Soft measuring tape
- A measuring partner (for optimal measurements).

To find your size, measure your

- Chest
- Waist
- Hips

To find your length, measure your

- Top Length & Kilt Length (Two-Piece Apron)
- Total Length (One Piece Apron)

Key Measurements

Chest (C).

The chest should be measured around the fullest part of the chest.

Waist (W).

Circumference of waist at bully button level.

Hips (H).

The hips should be measured around the fullest part of the body.

Top Length (TL).

Measured at the front of the body, from center of the shoulder to the hem of vest. The finished length should allow a minimum of 10 cm overlap (vest and kilt overlap).

Kilt length (KL).

Measured from the top of the kilt to the knee.

Total length (L). This should be measured from center shoulder on the front of the body to the hem of the apron or to the knee.

	Extra small	Small	Medium	Large	Extra large
To fit chest up to (C)	82cm	92cm	102cm	112cm	122cm
To fit waist up to (W)	71cm	81cm	91cm	101cm	111cm
To fit hips up to (H)	87cm	97cm	107cm	117cm	127cm

Lengths	Short	Regular	Long	X - long
1 piece Apron (L)	82cm	92cm	102cm	112cm
2 piece Apron (KL/TL)	51cm	56cm	61cm	66cm
